The flight plan provides direction for the chapter and, “balance,” for events in order to keep within the philosophy of our purpose which is to, “foster interest, promote safety, and provide educational opportunities in matters related to aviation within our community.” The six areas outlined above list the various objectives that should be addressed by the chapter in order to help meet the stated goals and that the club does not become, “lop sided,” in any one activity be it social or educational. The hope is that each activity will support as many of these objectives as possible and not exclude any of them.
